

Personal study · not live market data

08 — Put it together + daily drill

3×3 wrap-up: candles, S/R, RSI range/shift/divergence, BB father-son, on **M/W/D**.

Order of marks (same every stock)

1. **Structure** — zones, trend or box (M then W then D) 2. **RSI range** — bull / neutral / bear on each 3. **Shift** — yes/no 4. **PRD / NRD** — strict divergence or none 5. **GFS** — setup or not 6. **BB father-son** — agree or not 7. **Candle** — alert bar only if 5 or 6 is alive 8. **Verdict** — long idea / short idea / skip

If 8 is skip, you still **did the work**. That is the 100-chart habit.

Daily drill (offline)

Use a new chart-pack PDF when you have one. Same universe is fine; **new dates** appear as history grows when you regenerate on a computer.

Suggested volume:

- Week 1: **5 names** × 3 charts, full checklist
- Week 2–3: **10 names**
- Later: **20+** toward his “many charts a day” — speed without sloppy divergence

iPad

Import PDFs into **Goodnotes** / **Notability** / **Apple Books** / **Files**. Markup with Pencil. **No network** after the files are on the device.
