

Personal study · not live market data

Chart annotation checklist (use after the concept is clear)

For every stock, mark **month**, **week**, and **day**.

RSI 40 / 60

- ☐ Is RSI mostly 40–80 (bullish), 40–60 (neutral), or 20–60 (bearish)?
- ☐ Last touch of 40 or 60: held or failed?

Range / shift

- ☐ Same range for 20+ bars, or a **range shift** in progress?

PRD / NRD (divergence)

- ☐ PRD: price lower low, RSI higher low?
- ☐ NRD: price higher high, RSI lower high?
- ☐ Which timeframe? (M / W / D)

GFS (after that lesson)

- ☐ Monthly RSI vs 60
- ☐ Weekly RSI vs 60
- ☐ Daily RSI vs 40 (long) or 60 (short)

Candles / structure (after those lessons)

- ☐ Alert candle at the inflection?
- ☐ Nearby support / resistance?

One-line verdict

Bullish / bearish / skip — because: _____
